

CISS is a Suffolk County Council outreach service for Suffolk mainstream schools seeking additional support for pupils with:

- a diagnosis of ASD
- traits of ASD but no diagnosis
- social and communication difficulties
- social, emotional and mental health difficulties and all associated behaviours.

The key focus for the service is to maintain school placements, working with schools to build understanding and the capacity to manage their own effective inclusion for SEND pupils.

We are currently piloting Inclusion Surgeries which we will roll out in the summer term which offer twice termly opportunities to consult with a skilled CISS teacher on issues to do with inclusion, and to discuss the needs of individual pupils (with parental permission.) **This is the CISS Core Offer.**

In addition, through our **traded service** we offer the CISS Annual Package of support which includes 15 visits throughout the year to work with pupils and/or to work in partnership with the school on whole school inclusion issues. The Annual Package also includes one whole school training session.

For further information, please contact:

CISS Assistant Headteacher, West Suffolk; Central and South Suffolk;
Ipswich South and West

CISS Assistant Headteacher, Suffolk Coastal; Ipswich North and East;
Lowestoft and Waveney
ian.wickson@suffolk.gov.uk.

Dyslexia Outreach Team (DOT): Supporting Literacy in Schools

DOT works in partnership with schools to improve outcomes for learners who have significant difficulties acquiring literacy skills. A diagnosis of dyslexia is not needed to access the service.

Our **Core Service** works with schools to best meet the needs of individual students at Key Stage 2 and 3 who are not making expected progress following school intervention. Assessment of literacy need and action planning with student, staff and parents/carers defines the level of support offered. This may include; modelled teaching, staff mentoring in the delivery of appropriate intervention, advice around dyslexia friendly resources, intervention, strategies, and assistive technology.

Our **traded service** offers schools:

- Full diagnostic assessment
- Literacy assessment
- Access arrangements
- Consultation meetings
- Staff training.
